Anesthesia for the Uninterested | Anesthesiology | ASA ...

Under general anesthesia, you don't feel pain because you're completely unconscious. General anesthesia usually uses a combination of intravenous drugs and inhaled gasses (anesthetics). General anesthesia is more than just being asleep, though it will likely feel that way to you.

General anesthesia - Mayo Clinic

May be used on its own or combined with general anesthesia. General anesthesia: Uses a combination of intravenous and inhaled gases to produce a sleep-like state where the patient is unconscious and will not respond to any stimuli, including pain.
