Since the 1979 edition of ANSI/AWS D1.4, Structural Welding Code—Reinforcing Steel, was issued, further use by designers, engineers, and fabricators has necessitated a number of changes to the requirements; the 1992 and 1998 editions reflected these changes. This edition, AWS D1.4/D1.4M:2005, has additional revisions.

Foreword - American Welding Society

AWS D1.4/D1.4M:2005 38 Notes: 1. The horizontal reference plane is always taken to lie below the weld under consideration. 2. The inclination of axis is measured from the horizontal reference plane toward the vertical reference plane. 3. The angle of rotation of the face is determined by a line perpendicular to the theoretical face of the weld
